South Jakarta, Indonesia

Informatics Engineering graduate focused on AI Engineering and Data Science. Completed the Machine Learning Engineer program at Asah led by Dicoding with a predictive lead scoring capstone (XGBoost, ROC-AUC 0.91), reached the top 80 finalists of PIDI Digdaya x Hackathon 2026, and built a RAG system with a locally run 2B-parameter LLM as an undergraduate thesis.

Education

Universitas Gunadarma - **Indonesia** Sep 2022 - Aug 2026

Bachelor of Informatics, 3.71/4.00

- Thesis: "Implementation of a RAG-Based Chatbot API Using Qwen 3.5". Built a chatbot that answers accurately from documents, using a quantized Qwen3.5-2B model run locally on CPU via llama.cpp.
- Designed a hybrid retrieval pipeline and evaluated it with RAGAS: context recall 0.917, answer relevancy 0.812, context precision 0.749.
- Developed a semantic prompt cache with critical-term conflict filtering, achieving 85.7% decision accuracy and 100% false-positive prevention on critical term pairs.

Relevant Experience

PIDI Digdaya x Hackathon 2026 Mar 2026 - Sep 2026

AI Engineer - FinCrime

- Reached the top 80 finalists of PIDI Digdaya x Hackathon 2026 (Bank Indonesia x OJK) as an AI Engineer on a financial crime detection platform covering Risk Scoring, Fraud Detection, and Crypto Tracing.
- Team pitched the solution directly to PPATK as the prospective off-taker during the hackathon pitching stage.

Asah led by Dicoding Aug 2025 - Jan 2026

Machine Learning Engineer

- Completed the Capstone Project with front-end and back-end teams as the final project of the program.
- Built a predictive lead scoring model with XGBoost to predict customers likely to subscribe to a term deposit.
- Achieved ROC-AUC 0.91 and recall 0.61 on the positive (subscribing) class on the test set.

Skills and Certifications

- **Programming Languages**: Python, SQL, JavaScript
- **Framework Web**: FastAPI, React, LangChain
- **AI & Machine Learning**: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Fine-tuning, XGBoost, scikit-learn, Deep Learning, Gen AI, Agentic AI, RAGAS.
- **Tools & Platform**: ChromaDB, Ollama, llama.cpp, Docker, Git, VSCode
- **Languages**: Bahasa Indonesia (Native), English (Intermediate)
- **Certifications**: Machine Learning Engineer - Asah led by Dicoding (Jan 2026),
  Application Development Design - Universitas Gunadarma (Sep 2025)
